California Healthcare Provider Finds Backdoor to Insure Marijuana-Users

Woodland Hills, CA—Dec. 17, 2007— *The HealthCare Solution* (THCS), a California-based health insurance brokerage, has launched an effective program that gets marijuana-users instant approval for California health insurance.

Due to strict underwriting guidelines set by California's major health insurance institutions, marijuana-users run-the-risk of losing their health, jobs and relationships by being denied health insurance. However, a Los Angeles Healthcare provider, <http://www.thconline.com>, has found a **legal backdoor** to get these ineligible applicants the healthcare they need.

On December 17th, 2007 The Healthcare Solution released a new program called **California Health PLUS**, aimed at supplying medical insurance to marijuana-users. Now, for the first time since 1937, recreational marijuana- users can experience their daily activities with full health coverage.

California Health PLUS, is a partnership with leading health and fitness expert *Lesley Stein CPT* (member of the National Council of Certified Trainers). It includes a 3-step educational and fitness awareness program designed to increase the approval rate for marijuana users-seeking [California Health Insurance](#).

The **California Health PLUS** 3-step programs include:

1. A List of 16 Smart-Health Tips by Lesley Stein, CPT
2. Fitness Consulting
3. Strategic Health Plan Selection.

"It's is my duty to make sure every eligible individual can purchase [affordable California health insurance](#) at their will." –**Fred Wiener, President of THCS**

For years it's been rumored that applicants falsify applications to get insured. As a result, applicants get denied, plans get retroactively canceled and in rare instances, litigation occurs. This has lead to a growing number of Americans without health insurance.

Since The HealthCare Solution has launched **California Health PLUS**, more applicants are submitting accurate applications and are getting the health insurance with the coverage they need.
